

Dell SonicWALL Secure Mobile Access Basic Administration

Duration: 2 days
Price: \$1400
Certifications: CSSA
Exams: Online

Course Overview

The Secure Mobile Access Basic Administration (SMABA) Training Course provides instruction on the administration and management of the SMA appliance to provide secure, anywhere access to applications and resources for employees, business partners and other users. The course covers using the Appliance Management Console (AMC) to provide users with secure access to any application, from any network, based on secure authentication and authorization policies. Students will also learn how to deploy graphical terminal shortcuts for native Web-based access to Windows Terminal Servers and Citrix server farms.

This class is recommended for all administrators of Dell® Secure Mobile Access (SMA) appliances who need to maintain and monitor a Dell SMA appliance. Upon completing the course, students are encouraged to take the Certified SonicWALL System Administrator (CSSA) exam.

Target Audience

Dell SonicWALL Secure Mobile Access Basic Administration

Course Outline

Section 1: Course Introduction

- Course Introduction

Egypt Office:

10, 278th Street, Maadi, Cairo
